Summary

Full Stack Developer and Machine Learning enthusiast with experience in building real-time computer vision systems and responsive web applications. Skilled in React, Java, Python, and TensorFlow, with a strong foundation in data structures, OOP, and API development. Passionate about developing scalable solutions and solving real-world problems using AI and software engineering.

Technical Skills

Frontend: React, HTML5, CSS3, JavaScript

Backend: Java, Python

Machine Learning: TensorFlow, OpenCV, MediaPipe, CNN, RNN

Tools & Technologies: Git, GitHub

Concepts: Data Structures, OOP, Computer Vision, Real-Time Processing

Professional Experience

Career Infotech

April 2021 - September 2021

Python Developer Intern

- Developed Python-based applications and scripts, applying core programming concepts such as OOP and data structures.
- Worked on real-world projects involving data handling, automation, and basic problem-solving tasks.
- Collaborated with team members to debug, test, and improve code performance and reliability.
- Gained hands-on experience with software development practices, including version control and structured coding.

PROJECTS

Sign Language Vision To Text Using Deep Learning - Python

- Built a real-time sign language translation system using CNN and RNN models with ~85% accuracy.
- Used OpenCV and MediaPipe for hand tracking and processed live video at ~ 50-60 FPS.
- Optimized model performance to reduce latency and improve real-time predictions.

Railway Ticket Booking System

- Developed a responsive web application using React, HTML, CSS, and JavaScript.
- Implemented dynamic UI components and form validation for smooth booking flow.
- Designed scalable and reusable frontend architecture for better performance.

Computer Vision Developer – Gesture Volume Controller

- Created a real-time hand gesture control system using OpenCV and MediaPipe.
- Implemented finger tracking to adjust system volume based on gestures.
- Ensured low-latency processing for smooth and responsive interaction.

Additional Projects:

- **Falling Ball Game** (JavaScript, Phaser, p5.js)
- **Website Blocker** (JavaScript, Bootstrap)
- **Virtual Drag-and-Drop** (TensorFlow)

EDUCATION

University of Mumbai, MGM College of Engineering & Technology

Kamothe , India

Bachelor of Engineering in Computer Science / CGPI : 8.00

2022 - 2025

Samarth Samaj's Shivajirao S. Jondhale Polytechnic, MSBTE

Ambernath , India

Diploma in Computer Technology / Scored : 81.71%

2019 - 2022

CERTIFICATIONS

- Certified Training in Python 3 - Career Infotech with hands-on projects and exercises.
- Aptitude and Life Skills - Campus Credentials.
- Fundamentals Programming and Advanced Programming-Optimization of Coding - Campus Credentials.
